LAR (Luxury Africa Resorts)
Technical & Commercial Audit – Terms of Reference (TOR)

1. Background & Purpose

LAR (Luxury Africa Resorts) is a multi-vertical tourism platform integrating Flights, Hotels, and Car Rentals through external GDS and supplier APIs, including Amadeus. This audit is intended to assess technical correctness, commercial risk exposure, customer journey integrity, security hygiene, and go-live readiness.

The purpose of this audit is not only to validate functional correctness, but to identify, quantify, and prioritise risks that could materially impact revenue, customer experience, operational stability, and partner credibility at scale.

2. Audit Objectives

- Validate end-to-end booking integrity across Flights, Hotels, and Cars
- Identify, quantify, and prioritise technical, commercial, and operational risks
- Assess go-live readiness using a severity-based decision framework
- Provide an actionable, CTO-executable remediation roadmap
- Support confident Go / Conditional Go / No-Go decisions

Apart from Intergration modules (Flights, Hotels, and Cars), LAR has five customer facing modules or platforms and 1 administration module,

Platform	Persona	Description
Luxury Agent Platform	Luxury Travel Consultant	Consultant who service High Net Worth individuals
Inventory Partner Platform	Inventory Partner	Organization or Individual who have luxury inventory on our platform
Agent Platform	General Travel Agent	Individuals running their own travel agents and want to access our offering for their client
General User	HNWI	HNWI self service

3. Audit Scope

3.1 Functional & Integration Audit (Per Vertical)

Flights:

- Live vs cached fare parity validation
- Branded fares, baggage, penalties, and fare rule accuracy
- Repricing behaviour between search, booking, and ticketing
- PNR creation integrity (segments, SSRs, contacts, remarks)
- Ticketing workflows:
  - Auto-ticketing
  - Time-to-Live (TTL) / hold handling
  - Void, reissue, and refund paths

Hotels & Cars:

- Availability vs confirmation mismatches (HK / UC / HL)
- Supplier confirmation latency handling
- Partial confirmations and rollback behaviour
- Cancellation, modification, and no-show workflows

3.2 Booking Flow & Customer Journey

- End-to-end journey mapping (search → booking → payment → confirmation → post-booking)
- Session lifecycle and expiry handling
- Retry and recovery behaviour for failed or partial bookings
- User-facing error handling and silent failure detection
- Cross-vertical consistency of customer experience

3.3 Revenue & Commercial Risk

- Identification of revenue leakage scenarios
- Failed booking and abandonment analysis
- Pricing mismatch and confirmation delay impact on conversion
- Risk classification per vertical (Flights / Hotels / Cars)
- Revenue impact expressed in percentage-based or currency-agnostic terms

3.4 Architecture, Stability & Scalability

- API usage patterns and rate-limit handling

© 2025. Luxury Africa Resorts. confidential

- Session and state management
- Retry logic, idempotency, and duplicate booking prevention
- Concurrency readiness and race-condition analysis
- Failure isolation across verticals and dependencies

3.5 Error Handling, Logging & Traceability

- End-to-end transaction traceability
- Correlation IDs across services
- Rollback safety for failed or partial transactions
- Diagnostic capability using logs and traces
- Ability to reproduce and analyse failures

3.6 Security, Compliance & Fraud Exposure (High-Level)

- Passenger and traveller PII handling
- Logging exposure risks
- Token and credential management
- Traveller profile duplication or misuse risks
- Fraud-enabling patterns:
  - Duplicate bookings
  - Replay risks
  - Session abuse

4. Audit Methodology

The audit shall be conducted using a structured, multi-layer methodology, not a checklist-only review.

Methodology includes:

- Control checklists per vertical (Flights / Hotels / Cars)
- Documentation and configuration review
- Controlled pre-production booking scenarios
- Session, repricing, retry, and failure-path testing
- Evidence collection (logs, traces, booking references)
- Risk classification using a defined severity model

© 2025. Luxury Africa Resorts. confidential

Severity Model:

- P0 – Go-Live Blocker (must be fixed before production)
- P1 – Revenue / Customer Risk (immediate post-go-live exposure)
- P2 – Operational / Scale Risk (medium-term impact)

Each finding will include:

- Root cause
- Why it matters
- What breaks in production
- Recommended corrective direction (not code)

Audit Assumptions & Dependencies

The audit is conducted based on the following assumptions:

- LAR will provide access to agreed **pre-production environments**, configurations, and credentials required for audit execution.
- Supplier, GDS, and third-party APIs (including but not limited to Amadeus) will be available and operational during the audit window.
- Test data provided by supplier will be **representative of real-world booking scenarios**, including edge cases where available.
- Any material limitations (environmental, supplier-side, data-related, or access-related) encountered during the audit will be:
    - Explicitly documented as **audit constraints**, and
    - Clearly distinguished from platform-related risks or findings.

Failure to meet these assumptions shall not invalidate the audit, but shall be recorded as part of the audit findings and context.

5. Deliverables

The auditor shall provide the following mandatory deliverables:

5.1 Audit Framework Document

- Finalised scope
- Methodology
- Severity and impact model

5.2 CTO-Level Audit Report

- Sectioned by Flights / Hotels / Cars
- Cross-vertical systemic risks
- Action-oriented findings suitable for execution by LAR's engineering team

5.3 Risk Register & Remediation Backlog

- Risk description
- Severity (P0 / P1 / P2)
- Impact assessment (revenue, customer, operational)
- Recommended remediation approach

5.4 Go-Live Readiness Summary

- Overall readiness assessment
- Explicit Go / Conditional Go / No-Go recommendation
- Conditions required if proceeding with Conditional Go

5.5 Evidence Requirements

- Reproducible steps for all P0 and P1 findings
- Supporting logs or traces (sanitised where required)
- Annotated flow diagrams where complexity warrants

5.6 Audit Limitations & Constraints Register

The auditor shall maintain an **Audit Limitations & Constraints Register** identifying:

- External system unavailability
- Supplier-side failures
- Environment or data gaps

© 2025. Luxury Africa Resorts. confidential

- Scope exclusions encountered during execution

This register shall ensure:

- Transparency of audit coverage
- Clear separation between platform risk and external dependency constraints
- Protection against false positives or misattributed findings

6. Out of Scope

Unless explicitly agreed in writing, the following are excluded:

- Code changes or implementation
- UI/UX redesign
- Stress testing
- Formal penetration testing

7. Timeline

- Audit execution: 5–7 working days
- Final report delivery: within 3 working days after audit completion

8. Engagement Principles

- Evidence-based findings only (no opinion-only assessments)
- Actionable and prioritised recommendations
- Independence and objectivity
- No dilution of depth that would create false go-live confidence

9. Acceptance Criteria

The audit shall be deemed complete only when:

- All deliverables listed in Section 5 are submitted
- A walkthrough session of findings is conducted with LAR stakeholders
- Clarifications raised by LAR are addressed
- LAR can confidently make a Go / No-Go decision based on the outputs

© 2025. Luxury Africa Resorts. confidential

9.1 Findings Walkthrough & Clarification Process

Findings Walkthrough

- A formal findings walkthrough session shall be conducted upon delivery of the draft audit outputs.
- The session shall include:
  - Review of all **P0 and P1 findings**
  - Technical clarification and challenge discussion
  - Validation of evidence and assumptions

Clarification Window

- LAR shall have **five (5) business days** following the walkthrough to raise clarification requests.
- The auditor shall respond to all clarification requests in writing.
- The audit shall not be deemed complete until all clarification requests are addressed.

10. Post-Audit Remediation Considerations

Following completion of the audit and acceptance of deliverables, LAR may, at its sole discretion, undertake one or more remediation initiatives to address findings identified during the audit.
Such remediation activities may include, but are not limited to:

- Technical fixes
- Architectural adjustments
- Configuration changes
- Process or operational improvements
- Supplier or integration-level corrections

The audit engagement **does not include** any remediation, implementation, or fixing activities.
LAR may elect to:

- Address findings internally,
- Engage third-party service providers, and/or
- Invite the auditor to submit a **separate, non-binding proposal** for remediation services.

Any post-audit remediation work shall be governed by a **separate Terms of Reference and/or Statement of Work**, subject to independent scope definition, pricing, and approval.
Nothing in this TOR shall be construed as an obligation on LAR to award any remediation work to the auditor.

Statement of Work (SOW)
LAR Technical & Commercial Audit

1. Engagement Objective

Conduct an independent, evidence-based audit to determine LAR go-live readiness and risk exposure.

2. Scope of Work

As defined in the LAR Audit TOR (attached).

3. Deliverables (Acceptance-Based)

- Framework Document
- CTO-Level Audit Report
- Risk Register
- Go-Live Readiness Summary

4. Hard Acceptance Clauses

- All P0/P1 findings must include reproducible evidence.
- Deliverables must be reviewed in a live walkthrough session.
- LAR has 5 business days to request clarifications.
- Audit is not deemed complete until clarifications are addressed.

5. Go / No-Go Accountability

Auditor must provide a clear Go / Conditional Go / No-Go recommendation.
Conditional Go requires explicit conditions.

6. Out of Scope

- Code changes
- Load testing
- UI/UX redesign
- Penetration testing

© 2025. Luxury Africa Resorts. confidential

6a. Post-Audit Remediation Engagements

The parties acknowledge that this engagement is strictly limited to audit activities as defined in the TOR and SOW.
Any remediation, fixing, implementation, or corrective work arising from audit findings:

- Is **explicitly excluded** from this SOW
- Shall not commence under this agreement
- Shall require a **separate and independently executed TOR and/or SOW**

At LAR's discretion, the auditor **may be invited** to submit a proposal to perform some or all remediation activities identified during the audit.
Such invitation:

- Does not constitute a commitment or guarantee of award
- Shall be evaluated independently by LAR
- Shall be subject to commercial, technical, and governance review

Audit independence shall be maintained at all times, and audit findings shall not be influenced by any potential future remediation engagement.

7. Commercials & Payment Milestones

7.1 Audit Fee Structure

- The audit shall be delivered on a **fixed-fee basis**, as agreed in writing.
- No additional charges shall apply unless approved through a formal change request.

7.2 Payment Milestones (20 / 60 / 20 Structure)

Payment shall be structured as follows:

20% – Audit Kickoff & Planning Milestone

Payable **only upon delivery and acceptance** of an **Audit Initiation & Planning Pack**, comprising:

- Confirmed audit scope matrix aligned to the TOR (Flights / Hotels / Cars)
- Audit methodology confirmation, including application of the P0 / P1 / P2 severity model
- Test scenario catalogue covering controlled booking, repricing, failure, and recovery scenarios
- Access and dependency register (environments, credentials, third-party dependencies)
- Detailed audit timeline and milestone plan

© 2025. Luxury Africa Resorts. confidential

- This milestone confirms mutual understanding of scope, methodology, and execution approach.
  No audit execution findings are expected at this stage.

60% – Draft Audit Delivery Milestone

Payable **only upon delivery** of all **draft audit deliverables** listed below, in compliance with the TOR:

- Draft Audit Framework Document
- Draft CTO-Level Audit Report (sectioned by Flights / Hotels / Cars)
- Draft Risk Register & Remediation Backlog
- Draft Go-Live Readiness Summary
- **Conditions:**
  - All P0 and P1 findings must include reproducible evidence
  - Deliverables must be complete, internally consistent, and review-ready
  - Delivery must materially conform to the agreed TOR scope

20% – Final Acceptance & Closure Milestone

Payable **only upon completion of acceptance**, defined as:

- Successful walkthrough session of all findings with LAR stakeholders
- Written resolution of all clarification requests raised by LAR within the agreed clarification window
- Delivery of final, updated audit artefacts incorporating agreed clarifications
- Explicit issuance of a **Go / Conditional Go / No-Go** recommendation

7.3 Acceptance Dependency

The final **20% payment is explicitly dependent on acceptance** as defined in Section 4 (Hard Acceptance Clauses).

- Partial, incomplete, or non-compliant delivery shall not trigger final payment.
- LAR reserves the right to withhold payment for any milestone where deliverables materially deviate from the TOR.

8. Confidentiality & Independence

- NDA supported
- Auditor to act independently and maintain confidentiality.

© 2025. Luxury Africa Resorts. confidential

9. Ownership

- LAR retains all Intellectual Property entire assignment.

10. Termination

- LAR may terminate if deliverables materially deviate from TOR.
